

sailing 1

Exquisite and unrivaled
craftsmanship

Product features

- The most powerful and the most functional among batteries
- of the same size
- Plug and charge on any smartphone
- Unique craftsmanship, as exquisite as diamond
- Emergency LED torchlight
- Intelligent multi-level protection ensures safety and reliability
- Highly efficient voltage booster circuit, actual power output is 10% higher than ordinary products
- Alloy plastic structure ensures ruggedness
- Smart sleep mode helps save power and prolongs endurance
- Supports simultaneous charging of external battery and mobile phone
- Before you go out, the phone and the battery are both fully charged

Specifications

Name	sailing 1	Model	PH10
Input	DC5V 1A MAX.	Output	DC5V 1A MAX.
Capacity	2600mAh	Weight	~74g/2.61ozs
Size	~L90 x W30 x H21mm ~L3.54 x W1.18 x H0.83inches		
Charging time	~3.5 hours (using 1AAC adapter) ~6.5 hours (using 500mAAC adapter or PC USB)		
Environment for Use	Outdoors/indoors/inside a vehicle		
Ambient Temperature for Use	Charging 0°C~45°C; discharging -10°C~60°C		
Environment for Storage	-20°C~60°C		
The electrical core will have 85% capacity left after 300 cycles. (From fully charged to fully discharged is a cycle)			

product appearance

Accessories

1 Charge sailing 1 with AC adapter (AC adapter is not bundled)

2 Charge sailing 1 by connecting it to USB port on computer

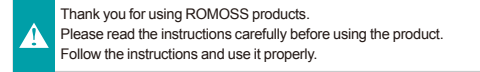

3 Charging digital products using sailing 1

sailing 1

High-performance External Battery

Support to most DC5V USB input smartphones, tablets, MP3, MP4 and other digital products charging.

Instructions

Charging sailing 1 (Figure 1 / Figure 2)

1. Use original USB data cable and connect micro USB to micro USB port on sailing 1;
2. Connect USB cable to USB port on DC5V USB charger or computer. If LED signal flickers, it means sailing 1 is being charged;

Charging digital product with sailing 1 (Figure 3)

1. Check if the charging voltage of the digital product is compatible with the DC5V output voltage of sailing 1.
2. Use the digital product's original cable, and connect one end to the digital product, the other end to sailing 1. If battery signal (output signal) lights up, it means the charging process starts. When the signal (output signal) goes out, it means the digital product is fully charged.

Flashlight function

- Press the switch for 2~3 seconds to turn on the LED flashlight and another 2~3 seconds to turn it off.

Residual capacity indicator

LED Signal	Battery Percentage
1st signal lights up	0~25%
1st, 2nd signals light up	25~50%
1st, 2nd, 3rd signals light up	50~75%
1st, 2nd, 3rd and 4th signals light up	75~100%
